“A new age of consumers has risen, and with them comes a desire for information that is not only mobile and visually stunning, but comprehensive and immediate.”

RTV has been consistently delivering the best since 1999

Jason LaVanture – RTV Founder/ VP

The process of selling a home in today's market has moved far beyond planting a “For Sale” sign in the yard. Modern buyers and sellers alike demand a more comprehensive approach that uses the latest technology.

Many of the top agents today are using the proven power of RTV to professionally market their listings, both online and off. The RTV property marketing system is a comprehensive virtual tour creator and marketing engine, expressly designed to help real estate professionals capture more listings, serve clients more efficiently, and close leads faster.

RTV virtual tours are far more than a series of eye-catching photos and scrolling panoramic scenes. Our concept is very simple, and powerfully effective. The numerous features of the RTV system make it easy for home buyers to receive a truly accurate view of a property and its surroundings—directly from our interactive media player.

Welcome to Fusion: Interactive virtual media that's so much more than a virtual tour. Only from RTV.

Real Estate listings with interactive media and a virtual tour receive 50% more views.

RTV Virtual Tours Powered by RTV

84% of home buyers begin their search for a home on the Internet.

Our Fusion platform combines high-definition still photos, interactive panoramic images, and captivating full-motion video into a single, lightning-fast, rich media presentation. It's like nothing you—or your clients—have ever seen. It's more than a tour...it's interactive virtual media.

Fusion is a complete turnkey system that includes everything you need to shoot, create, host, publish, and distribute your own interactive virtual media, with your branding—no watermarks or forced ads. To help you start using Fusion right away, all systems include an in-depth training session and ongoing, unlimited technical support. We've trained more than 4,000 virtual tour providers on our powerful system.

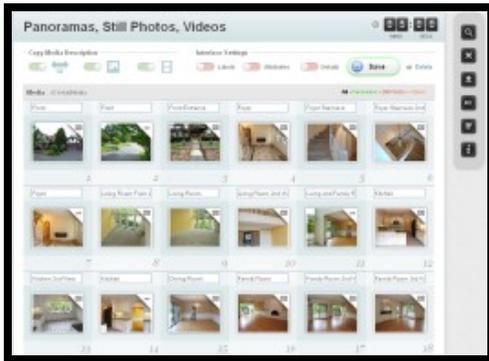

3 Steps to Seamless Success

1. Shoot

The highly flexible RTV system will support ANY digital camera! Our exclusive X3 rotator allows your camera to manually capture images in a circular area at pre-specified intervals. Our interactive virtual tours support 360-degree panoramic images, vertical panoramas, partial panoramas, still images, and full-motion video. Once the photos for each scene are captured and transferred to a computer equipped with Fusion software, the images are automatically stitched into flawless panoramic images with a single click—no manual stitching required!

2. Create

Simple Graphical User Interface = FAST Creation!

Once your still images, panoramas, and video clips are uploaded to our media servers, they're automatically identified, compressed for fast load times, and resized to enable high-definition playback. Simply: 1. Drag and drop your images in the order you would like them to appear in your presentation, 2. Add scene descriptions, 3. Select your flyer template, 4. Add any hot spots or floor plans, 5. Choose one of our five computer-generated voices to narrate your tour, 6. Be sure to turn on one of our four lead capture tools, and 7. Print out your QR code, and you're ready to publish!

3. Publish

One-click publishing and weekly reports!

Publishing your virtual tour is as simple as clicking. Fusion features one-click publishing to your website, YouTube (where the title and description are added automatically), Realtor.com, and Craigslist. You can also link your presentation on popular sites like Trulia, Zillow, HotPads, and more with a single click. Be sure to use our non-branded link on your MLS system and our fully branded link on your personal website. Your sellers will love Fusion's weekly reports, detailing all their online listing activity.

Fusion is an incredible system. It's the only platform that gives you the ability to combine full-motion video, HD stills, and panoramic images to deliver a truly immersive experience for the viewer. In addition, Fusion integrates detailed property information that's only a click away from the visual presentation, to tell the full story of each listing.

Most tour engines feature huge, slow-loading files. Fusion not only loads quickly, it also entertains during buffering. Visitors can view your brand and property details as the media loads in the background.

Next, the user is shown the tour interface, with additional property details such as precise location and MLS information. The interactive virtual media player is now ready to launch.

As the tour begins, viewers scroll through pictures and videos with the toolbar at the bottom, or clickable hot spots on the images. Buttons alongside the images direct the viewer to access additional details.

Our Tools page is laid out so that home buyers can press a single button to contact the agent, print a brochure, bookmark the tour, share with social networks, use our mortgage calculator, check out the listing's Walk Score and area map, burn the tour onto a CD, and much more.

Our Property Information page displays detailed information about the property—amenities, beds, baths, price, square footage, and more. This page also features a full property overview, and allows visitors to grab the printable flyer.

Once a viewer connects with a tour, it's essential that they're able to connect with YOU. Agent contact info is listed at several points throughout the tour, and our agent information page makes contacting you a snap. There's also a featured link to your interactive tour gallery.

Dual Interactive Virtual Media Player

RTV combines the agility and speed of Adobe Flash for desktops, and HTML 5 for mobile users, to create a powerful virtual tour engine that's capable of displaying HD stills, panoramas, and full-motion video at lightning-fast speeds. Whether your content is viewed on a mobile device or a PC, the result is equally breathtaking.

Mobile Tour 2

RTV's technology is smart and intuitive. When a viewer is browsing your presentations with a web-enabled phone or mobile device, our virtual tours automatically display the HTML 5 mobile-compatible version to ensure maximum compatibility. Furthermore, we track your mobile hits and QR code scans, and write them to your hit report each week. Have a gyro-enabled phone or device? Even better! Simply pan, tilt, and move interactively through panoramas and scenes within virtual tours by steering your device in the direction you'd like to navigate.

EZ Planner

Adding a floor plan to a virtual tour incorporates a new dynamic to an already powerful, visually stimulating marketing tool. However, the problem has always been that the software for creating floor plans is costly, and most programs come with a hefty learning curve. But Fusion's EZ Planner is affordable and intuitive, with an easy-to-use interface that instantly connects your floor plan to your interactive virtual tour for you!

Active Plans

What good is a floor plan if it's hidden in the background, and only becomes available **if** the user clicks on a floor plan button to view it? With RTV's Active Plans, you can instantly integrate a floor plan into your virtual tour—whether it's created with our EZ Planner, or any other floor plan software. Your floor plan remains in place over the image while users pan from room to room. Active Plans also support hot spots, and show users what part of the room they're looking at with a quick-view directional compass.

AudioPal

RTV's new AudioPal allows you to choose from five natural-sounding, computer generated voices to automatically narrate your virtual tours. AudioPal simply reads the text-based scene descriptions as the images transition in the Fusion player. For further customization, you can also upload a professional voiceover, or insert individual scene-by-scene narrations with your own voice!

Cloud Recorder

Other platforms that support voiceover narration require you to use third-party software to create your narrations. But with RTV's advanced Cloud Recorder, you can simply use your computer's built-in microphone and your Internet connection to add high quality, whole-tour or scene-by-scene narrations to any or all of your online virtual tours.

MyAudio

Do you have a preferred collection of royalty-free music clips that your clients love? Now you can save even more time by uploading your favorite audio files to your MyAudio library for future use. No need to continually upload the same clip over and over again—we store your clips right in your profile for quick access.

AstroZoom

Looking for a way to WOW visitors and customers with your virtual tours? Fusion's latest and greatest feature grabs viewers' attention with something they've never seen before: an outer space fly in! AstroZoom lets you zoom in from outer space, directly to your property or business. We'll create a powerful, visually stunning video that starts with a view of Earth from space, and then slowly zeroes in on your listing or business.

CraigsLister

We all know how much traffic real estate listings on craigslist get but the trouble for most people is the time it takes to generate a nice looking ad, post it and also remember when to publish it to the site again. CraigsLister does all this for you. With the click of a button your craigslist ads are automatically generated and our browser plug-in tool makes posting your ad on craigslist literally as easy as drag and drop.

Email Trapper

Ever wonder who is sending your virtual tours, and to whom? The new Fusion Email Trapper gives you a list of the sender and recipient.

If you're an aggressive marketer and want to quickly build an email list of home shoppers, the Email Trapper will notify you each time your virtual tour presentation is sent. This is a perfect lead mining tool for agents who send monthly newsletters to home shoppers and sellers.

Single Interactive Virtual Media

RTV's HTML 5 and flash based virtual tour engine displays HD stills, panoramas, and full motion video in one interactive, vibrant rich media player at lightning fast speeds! Now Publish panoramas in a variety of formats from cylindrical to 360 X 360 spherical, Cubical, one shot, even vertical and you're guaranteed to LOVE the outcome.

Individual Download

The Fusion system has made downloading images easy, even for tech-challenged customers. Instead of downloading all the images in one large zip file that may confuse the customer, the Individual Download page displays a gallery of thumbnail images. The customer can simply click the download button to instantly download an image to their computer.

MagicPlan

RTV is proud to offer you MagicPlan. This application (available in the Apple Store) allows you to create a floor plan on any iPhone, iPad, or iPod by simply turning around the room. Next, press "Send to RTV" and you're done! The next time you login to your r Fusion Tour Management System, you can integrate the floor plan into your virtual tour, complete with hot spots and directional radar.

MySize

RTV has built the Fusion virtual tour system with a focus on superior quality and speedy delivery. With our new MySize feature, you can bypass our built-in resize and compression algorithms, publishing your still images and panoramic images to your own specifications. We'll leave your images alone and allow you to choose the resolution and compression settings. No other virtual tour system allows you the flexibility of Fusion.

Private Tour

RealTour Fusion is packed with four very powerful lead generation tools and one of our favorites is our Private Tour. Simply enable the private tour in your TMS, assign the password or let your client login to their toolbox and do so. Once the Private Tour has been enabled, tour viewers are prompted to input a password before they're able to view the virtual tour. Private tour serves as a wonderful lead generation tool as well as just one more way to give your clients peace of mind.

Reseller Dashboard

With most virtual tour systems, you must pay either a monthly fee or a per-tour fee, with no money coming back to you. With RTV, you'll not only reap the benefits of the most powerful and easy-to-use virtual tour system on the market, but you'll also earn extra income by referring friends, helping RTV set up national accounts, and converting "do-it-yourself" offices to the RTV virtual tour system. RTV pays you a generous 20% commission on all accounts that you bring in. Plus, you can login to your reseller dashboard to see all referred accounts and commission amounts.

RTV Radio

Tired of the same song playing over and over on your virtual tour presentations? With the powerful Fusion virtual tour system, you can choose multiple tracks to play during specific presentations. If the viewer is still watching your tour when the first song completes, we'll queue up the next song in line. Fusion is all about keeping you ahead of the competition.

Single Property Website Maker

Creating a single property website is a breeze with Fusion's built-in Single Property Website Maker. After checking to see if your domain name is available, you can purchase it directly through Fusion for a small one-time fee—no ongoing monthly charges! With RealTour Fusion, your single property website will be up and running in less than five minutes, with a polished, professional look.

Smart Titles

Save time editing your virtual tour by using Smart Titles to quickly name the scenes. As you begin to enter a title, the Smart Titles feature will supply a list to choose from, such as Living Room and Master Bedroom, so you don't have to type the whole title. You can modify your Smart Titles list to match your preferred titles.

Tour Showroom

Ever wish you could take along your five best virtual tours and have them auto-play throughout a trade show? Are you a real estate agent or broker who would like to set up an office display with your hottest listings looping from one to another? Simply click on our Tour Showroom feature and select your favorite virtual tours. Fusion will package and download your presentations and create an autorun file for easy burning onto a CD. Fusion's Tour Showroom allows any virtual tour provider or real estate agent to make a memorable and professional impact.

Tour2QR

Automatically rip any of your virtual tours to a QR code. Want a printable version? Simply enter the size of the QR code you would like to create and our Tour2QR creates a QR code of ANY size for you on the fly. Now that's automation!!

EasyMLS

Fusion really has thought of everything! Simply input your listing's MLS number, click a single button, and all of the pertinent listing data appears automatically in your tour's amenity fields, including beds, baths, square footage, garage, neighborhood, price and more! EasyMLS saves you hours of inputting details—it's yet another feature that sets RealTour Fusion above the rest.

AutoExposure Engine

Getting your virtual media out there is easier than ever. With Fusion's powerful, built-in AutoExposure Engine, listings that feature all the data you use to populate your presentations are sent to the most popular real estate portals in a single click: Trulia, Zillow, FrontDoor, Oodle, Lycos, Local, HotPads, Vast, Properazzi, Dot Homes, Homes.com, HomeSeekers.com, Craigslist, YouTube, and more. The AutoExposure Engine gives your virtual tour an average of 50% more viewings!

Tour2Go 2.0

No Internet connection? No problem! RTV's new Tour2Go 2.0 is kiosk-ready and runs on both PC and Mac. All Tour2Go virtual tours are fully interactive, capable of pointing to additional information online, and come in full-screen HD! Get your office lobby ready to showcase your best listings all day long.

E-Brochure

Getting an email with a link to a virtual tour is nice, but getting a slick, organized, and graphically pleasing E-Brochure in your inbox is an experience. Any time a viewer uses the send-to-friend feature, the system will ask whether they'd like to send a plain e-mail with a link to the tour, or the more robust E-Brochure. Your weekly hit report will show you how many are clicking through.

Auto Flyer Generator

Struggling with complex third-party software to make flyers is a thing of the past with Fusion's built-in Auto Flyer Generator. Fusion comes preloaded with 40-plus gorgeous flyer templates and layouts, ready for your stunning photography to make them complete. Simply create your virtual tour and activate the Auto Flyer Generator, and viewers will be able to print a stunning flyer, complete with QR code, in a single click.

VideoRipper

You've probably heard plenty about the value of incorporating video into your presentations—but good video production takes time and money. With Fusion, you'll not only save money, you'll also get high-definition video with unparalleled quality and the fastest, easiest production process around.

Once your virtual tour is finalized, the VideoRipper exports your entire production—including stills, panoramas, video clips, music, and scene-by-scene narration—into a single video file. Fusion will then automatically post the finished video file to your YouTube account, using your virtual tour description, title, and tags to populate the data. You can also download the video file for posting to another site, or for burning onto a DVD or CD. It's the easiest video you'll ever produce!

TourVibes

With all the love for the "Like" button, it was only natural for us to integrate this behavior-based lead generator into Fusion. TourVibes allows for instant feedback from your interactive virtual tour by letting users click the "Like" button. Turn on TourVibes and start collecting contact information, comments, and more from your tour viewers. TourVibes writes back to your database, and keeps a downloadable log for importing into your favorite CRM.

Follow This Tour

Follow This Tour is integrated on the back end of all four Fusion lead generators. Any time a tour viewer looks for more information, they'll have the opportunity to "Follow This Tour." Once clicked, the system will ask the user to input basic contact information. The Fusion tour engine then sends that user updates when changes like Status Banner or listing price are posted to the virtual tour. Follow This Tour drives more traffic to your online tours than ever before.

Lead Grabber

Lead Grabber is a fantastic way to collect and mine data from your virtual tour viewers. When enabled, Lead Grabber prompts the tour viewer for some basic information before they're able to preview the virtual tour. All data and leads are stored in your clients' RTV online Toolbox, and can be exported at any time.

Hot Spots 3.0

RealTour Fusion brings hot spots to the next level, with the addition of Animated Hot Spots and InfoSpots. Any Hot Spot within a virtual tour can be linked to additional virtual tour scenes, URLs on the web, videos, and more. Hot Spots can also open text bubbles to provide more info for your viewers.

Client Toolbox

We understand that at the end of the day, what you're looking for is more time—to write more proposals, to go after new clients, and of course, more YOU time to reset, realign, and refocus. With our new Client Toolbox, you'll save more time than ever, because updating your listings is a snap. Log in any time to make quick edits to your tours, such as listing price changes, new phone numbers, profile adjustments, banner swaps, and more.

Double Agent

Creating virtual tours for multiple agents or teams is easy with Fusion. Our media player elegantly fades in and out from one agent to the next, displaying each individual's photo and contact information. If you co-list properties or have group listings, our Double Agent feature will help you gain more exposure for everyone involved in the transaction.

MyGallery 2.0

Virtual tour galleries just got a lot more impressive with our Google Map-enabled MyGallery. Each time you create a virtual tour, your Gallery page will auto-populate the tour data onto the page. These new galleries are easy to forward to a custom URL, and you're also given a snippet of code so you can embed the page directly into your website.

Tour Calendar

With RealTour Fusion's advanced Tour Scheduler Reminder System, you'll never forget to repost to Craigslist or refresh your listing on real estate portal sites again. Simply set it and forget it—until our system reminds you, of course!

Drag & Drop Manager

We wanted to make your transition from Tour Builder 4.0 to RealTour Fusion seamless and enjoyable. We also wanted to make sure that anyone would be able to create incredible, interactive virtual media presentations with **little to no experience**. That's why many of the editable regions of your virtual tour manager—from sorting your images to adding hot spots—employ a simple drag & drop method that saves you time and a big learning curve.

Smart Profiles

Our new Smart Profiles will save you hours of time each month! Each client's profile now remembers tour speed preferences, color scheme, theme layout, preferred flyer layout and much more! No more publishing a virtual tour and referring back to a checklist for each customer to finalize their virtual tour.

Tagit

Tagit is a fantastic feature that gets your virtual tours more views from the RTV virtual tour portal (www.RealTourFusion.com), Google, and your website. Tagit allows you to tag your virtual tours with additional information that home buyers are searching for: waterfront, acreage, open floor plan, shared frontage, vacant land, and any other distinctive features that will help RTV properly categorize your virtual tour. These same tags are used automatically to populate your video tour on YouTube.

Status Banners

Our pre-loaded status banners will help you generate excitement for your presentations. When you log in to TMS and mark listings as SOLD, PRICE REDUCED, SALE PENDING, JUST LISTED, and more, the Fusion status banner will automatically reflect your updated listing status.

HitStats 2.0

Fusion takes virtual tour traffic reporting to the next level by providing you and your clients with more data than ever before. We now feature a full breakdown of traffic and stats by day, month, quarter, and year. Our highly detailed reports show you the number of times your virtual tour has been emailed, downloaded, shared on social sites, viewed on a mobile phone, and sent to friends. We've also enabled Fusion to track the number of times various tools on the virtual tour are used, like the E-Flyer and the Printable Brochure. Ever wonder how many hits a virtual tour received in a certain month, compared to another? Now, you can log in to your TMS and access a virtual tour's entire history in just one click.

Tours2RSS

Now each virtual tour provider is given an RSS feed for their virtual tours. Use the RSS feed to AutoBlog on your favorite WordPress, Blogger or other blog so you don't have to lift a finger to build more back links to your virtual tours and of course get more eyes on them. Use the RSS feed to create an automatic HotSheet that will get emailed out to your database. Simply pair your feed up with Aweber or your favorite email management system. Tour2RSS is available on the RTV dealer level, the client / realtor level and also on the broker level so you're able to assist your customers into setting up pumper specific to a single brokerage, a team or an individual client / agent.

RTV Map Widget

The RTV Map Widget is one of the coolest features in the Fusion system. Each agent and brokerage is assigned their very own Map Widget to embed into any page of their website. Simply create a virtual tour, add tags with Tagit, and then check your map to find the tour. Visitors to your website can search your RTV Map Widget based on location, tour type (tags), price, or any other criteria that you've included in your interactive virtual media.

SpiderLinks 2.0

It's a proven fact that there's no better ranking virtual tour on the market than one from RTV. RTV virtual tours are known to pull rank in the search engines on property address, business name and even in some cases agent / owner name! RealTour Fusion kicks it up a notch by giving you, the virtual tour provider even more control on how your virtual tours will rank. Now you can easily modify underlying virtual tour META Data for your customers. Charge a fee or do it for free, the choice is yours. That's the amazing freedom that Fusion gives you. Not sure what to put into the fields? Don't worry because our system will still automatically input what we think should be a good fit for you and your customers tour in most cases.

RealTour Fusion Tour Portal

Over one billion tours served! That's right—since 1999, RTV has served up over a billion virtual tours and counting. Now, every presentation created by our thousands of users around the world can be found on our RealTour Fusion Tour Portal. The portal incorporates the RTV Map Widget and displays all interactive virtual media presentations in a searchable format. The RealTour Fusion Tour Portal has been designed to rank high on search engines, delivering even more exposure for your listings.

TinyTURLS

Instantly transform your long virtual tour links into smaller, more manageable tour URLs with TinyTURLS. Simply click the TinyTURLS button to generate a custom short URL that points directly to your online virtual tour. All TinyTURLS begin with www.TinyTURLS.com/ Use our TinyTURLS when you're looking to save space in any of your print ads, in MLS systems that require shorter URLs, or when tweeting.

Freedom Zoom

If you enjoyed the random pan-and-scan effect of our V-Slide from Tour Builder 4.0, you're going to love the way RealTour Fusion takes animating your HD still images to the next level. FreedomZoom gives you even more customization options—choose zoom-in or zoom-out, as well as start and stop points, allowing you to highlight special features within your images. Don't want to take the time to choose each start and stop point? Let RealTour Fusion mix it up with our built-in randomizer.

RTV
INTERACTIVE VIRTUAL MEDIA

Connecting & Learning

The **FORMULA**

Every month, hundreds of our users log on for two brand-new episodes of **The FORMULA**—an information-packed sales and marketing webinar hosted by our vice president, Jason LaVanture, and frequently featuring a guest host. Learn SEO, email marketing, blogging, social networking, and more—for free!

THE **IMAGE**

The IMAGE is an hour-long show that covers introductory and advanced photography tips, and explains how to capture the best images when shooting images for property marketing purposes. We also explore some useful techniques that our photographers can use to take advantage of Adobe Photoshop, elevated shots, night shots, filter usage, flash usage, and more!

For those just joining our network, we have over thirty archived episodes that you can listen to at your leisure. The IMAGE was originally created to provide RTV photographers with tips and tricks to help improve their photography for our national contract accounts, and the show has exceeded our expectations by helping thousands of our users win more business in their local markets, too.

SOCIAL **REALTY**

Social Realty is a brand new show hosted by RTV's Amber Murray. Amber is a social marketing guru who helps real estate agents, brokers, and other companies build stronger brands through social media.

Social Realty will be aired multiple times each week, and RTV virtual tour providers are encouraged to attend these shows to learn tips and tricks, which they can then share with their own customers.

RTV
INTERACTIVE VIRTUAL MEDIA

RTV BLOG

The **RTV Virtual Tour Blog** hosts a wealth of information published by thousands of our customers. Here, you'll gain firsthand insight into what other RTV customers are doing to get the most out of their RTV system.

The content is typically updated daily, and you can also subscribe to our blog feed for instant notification of updates. Pick up the phone and call some providers from the blog—you'll be surprised at how closely our customers work with each other.

SEO and Social Networking Training

RTV understands that although we are in the virtual tour industry, we are first and foremost in the

PROPERTY MARKETING BUSINESS

RTV Keeps You Competitive in an Aggressive Market

Now more than ever, real estate agents and brokers need powerful marketing strategies to stay ahead of the game. That's why we take our training one step further, and actually teach you how to use blogging, SEO, and social networking to enhance your sales and client retention. Through a three-month social networking course that takes just one hour a week, you'll be exposed to different social networks, social bookmarking sites, proven SEO techniques, and an **entire network** of people standing by to help you grow your business fast! Ongoing training is included as a FREE benefit of joining our network. This marketing bonus, coupled with our monthly newsletter, training programs, and webinars, keeps you updated and educated. You'll learn how to create and maintain the visibility and the competitive edge you need for maximum online exposure in an aggressive market.

PLUS! Our virtual tour viewer is search engine optimized and offers geographical targeting features. This means **YOUR** virtual tours appear more quickly in search engine results for your area. Individual virtual tours can be targeted for different areas, so you can rest assured that each virtual tour is specifically targeted to your location.

Our FusionMax X3 is the perfect solution for large brokerages or individual agents looking to differentiate and excel. Our X3 head ensures flawless image stitching, and will work with **any** digital SLR or point-and-shoot camera. Use our FusionMax X3 to take advantage of the powerful features we've built into the Fusion System.
